
Technologies for Smart and Sustainable Building

November 18th, 2021 - 3:00 pm CET

A **C2Future** virtual company mission, organised within **SMM2021**

Join the virtual “[company mission](#)” to:

- **attend the presentations** of the “hosting companies”
- **present your solutions** in the roundtable session
- **book on-line meetings** with other participants
- get in touch with the services and the partners of the **C2Future** cluster network

Topics and main hosting companies

IT for construction: A complete and interoperable solution for Building Information Modeling

- > **ALMA srl** (www.almasoftware.it) – A branch of ACCA Software, an Italian leading company in software for construction, architecture and engineering with coordination, collaboration and data management software and tools

Materials and processes for construction: Distributed Manufacturing for Production of Construction Drymix

- > **Personal Factory spa** (www.personalfactory.it) – Best in class drymix for a large range of construction and coating products, applying a patented technology and offering chemical compounds together with an integrated connected platform, Origami, to its partners - local distributors and builders - that are then enabled to produce construction materials on site and on demand, while optimizing their value chain and operating with sustainable and environment friendly processes.

IT for energy solutions: An intelligent monitoring system to optimize performance and prevent failures with photovoltaic and alternative energy systems

- > **Omniaenergia spa** (www.omniaenergia.it/) – Omnia Group companies provide solutions for reducing energy costs, identifying waste and managing energy efficient buildings.

Want to present your products/services?

Register and book a 3’ slot for presenting your solutions and/or propose technical / commercial collaborations (5 slots available)

Target: Companies interested in collaborations and partnerships for technology-based solutions for sustainable buildings from different related sectors, such as IT, constructions, components, and services.

How to participate

1. **Register** to the “company mission” before November 18 on [Company mission platform](#)
2. Optionally, book a 3’ presentation slot
3. **Attend the presentations** on November 18 at 3:00 pm CET
4. **Book bilateral meetings** on the on-line platform (login on [Company mission platform](#))
5. **Hold b2b meetings** until November 19 (using Zoom)

Programme

November 18th, 2021 - 3:00 pm CET

3:00 PM – **Welcome by the C2Future cluster network** - C2Future/ICT Cluster

3:10 PM – **A brief overview of EU opportunities for R&D and innovation projects on sustainable building** - C2Future/Green HoMe

3:30 PM – **Hosting companies**

Alma srl - A complete and interoperable solution for Building Information Modeling

Personal Factory spa - Distributed Manufacturing for Production of Construction Drymix

Omniaenergia spa - An intelligent monitoring system to optimize performance and prevent failures with photovoltaic and alternative energy systems

4:15 PM – **Quick presentations** (5 slots)

4:30 PM – **Final remarks**

Up to November 19 – **Online bilateral meetings**

Bilateral meetings

- Up to November 19, 2021
- Book your meetings on [Company mission platform](#)

Organisers and partners

The event is organised by **C2Future**, a COSME project by 6 European clusters from Bulgaria, Greece, Italy, Serbia, Spain, as part of **Smart Manufacturing Matchmaking 2021** ([SMM2021](#)), which includes other numerous events such as Brokerage Event, Webinar 4.0, World Investment and Young SMM2021 within the 17-19 November sessions.
